

Adult forensic stream contract variation

A summary of key progress milestones

KPI Programme
Mental Health
and Addiction
Aotearoa New Zealand

April 2020

Ministry of Health contract variation begins.

October to December 2020

Adult forensic indicator selection workshop held. Cultural safety, wait times and length of stay identified as key areas of focus.

April to June 2021

Analysis for length of stay and legal status completed. Data gaps identified as barrier to cultural safety focus area.

July to September 2020

First online workshop held to discuss sector priorities for Adult Forensic indicator development. Working group also established.

January to March 2021

Working group continues to refine and investigate three key areas of focus.

July to September 2021

- Wait times data dashboard indicator launched
- Data gaps identified as barrier to Wait times use – quality improvement at Canterbury and MHAIDS commences
- Dashboard needs analysis done for the Adult forensic use of Wait times indicator
- Seclusion use indicator needs analysis undertaken.

Refining what we have learnt so far...

Waiting Times

Wait times (first and third race to race contact)
FY20/21, Q2 (Oct - Dec 2020)
Canterbury and 4 other District Health Boards

Between Oct 1, 2020 and Dec 31, 2020, there were 1,337 service episodes started for tangata whai ora of all ages at Canterbury and 4 other District Health Boards; 1175 of which had an in-scope activity recorded. Of these, 1,030 (87.7%) had a first in-scope activity within 21 days, and 1,128 (96.0%) had a first in-scope activity within 56 days.
